

Single-cell transcriptomics of control vs type 2 diabetes (T2D): concept map

Circled numbers are the paper numbers in the 12-paper reading list (1 to 10b). Verified against paper text on 2026-10-06; see paper_findings_and_roadmap.pdf.

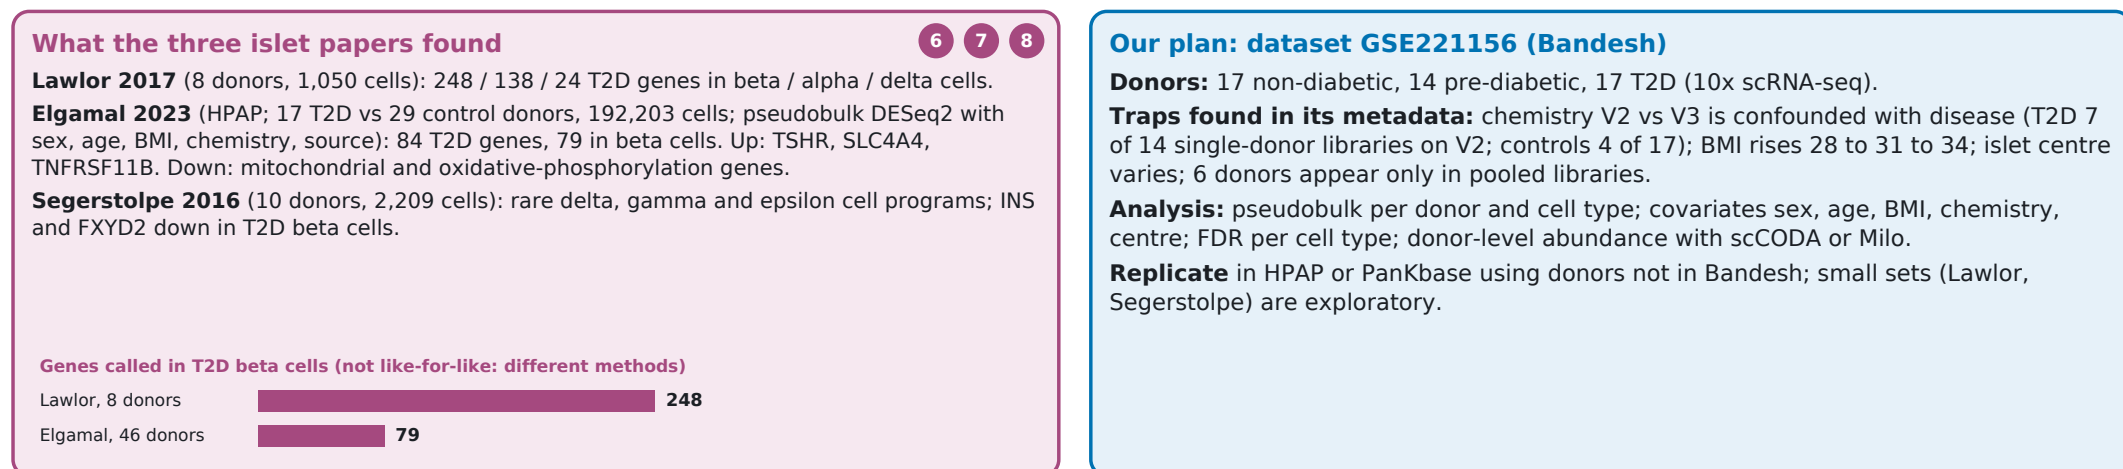

1. FROM TISSUE TO LABELLED CELLS

2. THE QUESTIONS

3. WHAT THE T2D ISLET STUDIES FOUND, AND OUR PLAN

Core rule: n = number of donors, not cells. 20,000 cells from 10 + 10 donors is n = 20.

Key: blue = pipeline, orange = batch, green = abundance, red = expression, purple = evidence. Numbers: 1 Luecken and Theis, 2 Heumos, 3 Squair, 4 Junttila, 5 Schmid, 6 Elgamal, 7 Lawlor, 8 Segerstolpe, 9a/9b integration, 10a Milo, 10b scCODA.
